

SPACE CONNECT

A PREFERENCE-BASED VENUE BOOKING PLATFORM

PROBLEM

Professionals, corporates, and organizers struggle to find and book suitable venues for events, workshops, and conferences. There is no unified platform that filters venues based on specific preferences like capacity, AV equipment, location, budget, and catering — forcing users to rely on phone calls, agents, and disconnected listings.

USERS

VENUE SEEKERS

- Corporates
- Freelancers
- Event organizers

VENUE OWNERS

- Hotels
- Co-working spaces
- Community halls

PLATFORM ADMIN

- Manages listings
- Approvals
- Disputes

PROBLEMS FACED BY ADMINS

- No centralized dashboard to monitor bookings and disputes
- Difficult to verify venue authenticity and quality
- No analytics on popular preferences, peak seasons, or booking trends

PROBLEMS FACED BY VENUE SEEKERS

- No single platform filtering venues by capacity, location, amenities, and budget simultaneously
- Lack of real-time availability
- No transparency on pricing or cancellation policies

PROBLEMS FACED BY OWNERS

- No digital presence or tool to manage slot availability
- Difficulty reaching the right corporate clientele
- Manual handling of inquiries leads to missed bookings

SOLUTION

Space Connect is a full-stack web application where venue seekers can search and filter venues based on preferences (location, capacity, amenities, budget), view real-time availability, and instantly book. Venue owners get a management dashboard to list spaces, manage slots, and track earnings.

TECH STACK

FRONTEND REACT.JS + TAILWIND CSS

BACKEND SPRING BOOT (JAVA) + REST APIS

DATABASE MYSQL (VIA JPA/HIBERNATE)

AUTHENTICATION SPRING SECURITY + JWT

FILE STORAGE AWS S3 (VENUE IMAGES)
HOSTING
